

Daikin has been a world leader in the development and manufacturing of different fluorine based products since 1924.

Daikin Chemical Europe was established in 1992. Based in Düsseldorf, Germany, we meet our customers' needs in Europe, Middle East and Africa.

Recently, Daikin has invested in Europe and is now proud to serve customers with fully-equipped application laboratories for diverse paper and pulp based applications.

## Your requirements

### LABELS

### FAST FOOD

### BAKING

### PET FOOD

### PULP

## Our barrier solutions

### Unidyne TG-8111

Our anionic all-rounder product for external sizing in neutral pH. With proper cationic process additives, effective also in wet-end.

### Unidyne TG-8811

Cationic grade which was designed for internal sizing in wet-end. In addition, the best choice for synthetic, unbleached and recycled fibers.

### Unidyne TG-8151

A new anionic grade with increased heat resistance. The best choice for pet food and pulp molding applications.

### Unidyne TG-8731

Our nonionic grade for surface sizing applications. The best choice for formulations targeting high KIT values.
